Guideline for writing Review paper

Title:- Choose title specifically reflecting topic of review. (The topic is your project chosen) for example:- A review of recent trends and technology of E-commerce.

Abstract:- An abstract should be of approximately 100-200 words. Provide a brief summary of the review question being addressed or rationale for the review, the major studies reviewed, and conclusions drawn. The abstract must clearly reflect the problem stated in project, How this study addresses the problems and Key results. do not include any reference in this section.

Introduction:- Introduce the topic and your rationale for addressing this topic focusing on why this topic is important. Clearly define exactly what this review paper will discuss, outline the order in which you will discuss each subtopic to give the reader any background information needed to understand the coming sections. The subtopics included in the further sections should be precisely written here in limited words.

Background or Literature Review (subtopics being addressed):- Although the structure may vary based on the sub-topics or reviewed technologies being addresses. For example, if you are reviewing three different methodologies, you might divide this section into three parts, each discussing one of the methods. In this section try to provide the brief description of similar kind of technology/method/idea proposed or implemented as you project is.

Methods and Materials:- In this section, be sure to describe the research methods and evaluate how studies were conducted focusing on the study design and analysis. Precisely describe all the methods involved in every above mentioned technology. The focus of this section should be to provide an overview in differentiation mode of already existing work.

Comparative analysis:- In this section try to compare all the previous work mentioned above on the basis of some criteria or statistical data. You can use any performance matrix, comparative chart to show the comparison. The data presented should not be old enough than 5 year.

Conclusion:- You should develop the conclusion by briefly restating the rationale for your review and the purpose of the article, then discussing the conclusions you have drawn. You should also discuss the implications, limitation of your review. At the end of the sections clearly mention your recommendation relating the review.

References:- You must clearly mention all the sources of information utilized for gathering and analysing the information. The references should be reflected with the specific number in between the different sections of paper as mentioned in this section.
